

# WINTER GREEN LANDSCAPE STUDIO

## JUSTIN WINTERS

Principal | Technical Leader

Justin has over 20 years of experience working both domestically and internationally on a range of project types, including urban design, workplace environments, university campus design, and park master plans. As a project manager leading teams on complex, high-performance developments, Justin has an established track record of working with clients, consultants, and contractors to achieve world-class projects.

Beyond design, Justin works to advance the profession through research, teaching, lecturing and mentoring. In 2013, he was co-recipient of the Patrick Curran Fellowship to explore the role of landscape architects in shaping the next generation of green cities. His work and research reflect a strong belief that landscape architects play an essential role in developing sustainable, humane solutions to society's collective challenges.
